Feed the Feathery Creatures

The wise owl and the robin have been working extremely hard to fix the problem with the oak tree. It's hungry work! They have no time to search for food. Can you help them by designing and making a bird feeder for them? What materials will you use for the bird feeder?

Catapulting Creatures

The woodland animals have a problem. The acorn tree has become too big for the farm animals to squeeze past and the farm animals will tell the farmer to cut down the tree. Can you help the woodland creatures design and make a catapult to help the farm animals cross the river. Can you predict how far your animal will travel?
