Teacher Note:

The semantic memory is part of the long term memory.
It is the recall of general facts and is knowledge based.

Facts remembered here are not related to personal or emotional experiences.

Mnemonics are a memory aid to help you remember common facts or knowledge.
Mnemonics are useful when remembering facts in a particular order, to anchor facts and to overcome memory block.

Mnemonics

There are more types of mnemonics you can use...Click below.
