

## Short Course – Pets – 1:7 – Artefact

### Example Dog Sculpture – can be used in final Assessment Presentation

Create a cylinder shape stuff it with newsprint to make it sturdy Begin to add on legs, head etc using tape card pipe insulating tube, whatever you can find that is recyclable.

Here you see the legs been held in position by broken pencils and tape. 3 layers of paper mache was added. Alternating between a coloured paper and white, always ending in a white layer for ease of decoration later.

The final design stage depends on the dog physical characteristics, what does the worksheet tell us? Curly hair colour of hair etc? Some students might like to design a dog coat if time permits!.
