

Activity 1: Design and Make a Sensory Hopscotch

Measures

- What size will our hopscotch be? What is the area of each box?
- How heavy should our throwing object be?

Materials

- What is the best material to use for each section of our sensory hopscotch?
- Which materials feel the best to step on?

Shape and Space

- What other shapes could we use to design our own hopscotch game?
- Can we put shapes inside each of the boxes instead of numbers?

Inclusion

- This activity can be enjoyed by all children.
- Children can freely select the materials that they wish to use for their sensory hopscotch.

Skills

- Predicting
- Investigating
- Measuring
